

Operators of recreation centers and waterparks recognize the pivotal role that slip-resistant coatings play in enhancing both safety and the overall visitor experience at their facilities. ecoFINISH®'s Beach Entry Coatings are slip resistance, abrasive coatings designed specifically to reduce slip and falls, by improving the foot traction of that surface area.

Our Beach Entry Coatings are both easy to maintain and aesthetically pleasing- offered in 9 standard colors that match existing aquaBRIGHT™ and polyFIBRO® pool coating colors.

Sometimes a little extra protection is needed in high traffic, slip prone areas. With Beach Entry Coatings, your guests will feel more comfortable walking and playing and have a more enjoyable guest experience. Reduce the slips. Extend their stay.

### USES

- Splash Pads
- Aquatic Ingress / Egress
- Pool Steps
- Waterparks
- Showers / Bathrooms
