

aquaBRIGHT™ is a revolutionary coating designed by ecoFINISH® to answer the problems seen in many paint, plaster, and other traditional aquatic coatings.

Our pneumatically-applied high-performance pool coating exceeds the strength, durability, and maintenance ease of conventional coatings with a color range that is modern and beautiful. Our coatings are engineered to be durable and soft on the feet, making this an ideal coating for commercial and residential pools and other water features.

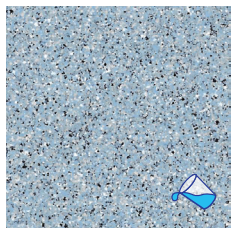

aquaBRIGHT™ is non-porous and pH-neutral, so there is no need for costly harsh chemicals at start-up. Our range of beautiful colors are stain, chemical, and UV resistant, all with an instant cure upon application, allowing you to fill your pools and start swimming right away. aquaBRIGHT™ reduces the environmental footprint by eliminating the mining, waste, and high chemical usage associated with plaster and paint finishes.

Benefits:

- Chemical and Stain Resistant
- UV Fade Resistant
- Color Uniformity
- Easy Maintenance (No Hot Start)
- pH Neutral
